AI-guided learning & cognitive well-being

**“Learning is not only about content,
but about how students process it.”**

Problems

01

Lack of continuous
academic support

02

High cognitive load

03

Difficulty understanding
complex topics

04

Stress and mental fatigue

Our Vision

TUTORING + MINDFULNESS

The decision to combine tutoring and mindfulness is based on the idea that **mental well-being is an essential part of the learning experience.**

- **Mindfulness-Based Mobile Apps in Education**
<https://formative.jmir.org/2021/8/e20678/>
- **Mindfulness and Academic Well-Being**
<https://iaapjournals.onlinelibrary.wiley.com/doi/full/10.1111/aphw.12188>

Our Vision

TUTORING

Guided, non-judgmental support
Inspired by academic tutoring

MINDFULNESS

Mental reset and focus recovery
Integrated into the learning experience

We don't simulate to test you.
We simulate to guide you.

What we built

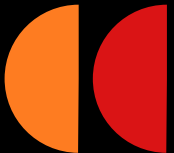

Tutoring

Mindfulness

We integrated them because research shows that learning performance is **directly affected by stress and cognitive load.**

So while the **tutoring room supports understanding**, the **mindfulness station supports the conditions needed to learn effectively.**

Tutoring Room

AI tutor as a learning guide with progressive explanations.

Scenario:

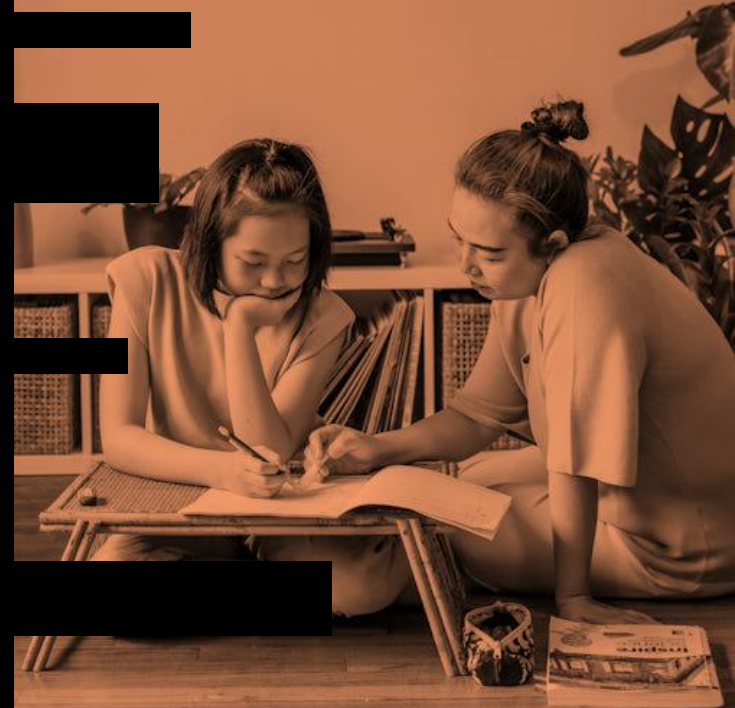

- Software Engineering
- Operating Systems
- Computer Networks

Design Choices

- No exam simulation → reduces pressure
- No judgment → safe learning space
- Focus on understanding, not performance

UX Principles

- Cognitive load reduction
- Clear and immediate feedback
- User control and pacing Non-judgmental interaction

What we built

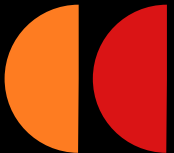

Tutoring

Mindfulness

We integrated them because research shows that learning performance is **directly affected by stress and cognitive load.**

So while the **tutoring room supports understanding**, the **mindfulness station supports the conditions needed to learn effectively.**

Mindfulness Section

Dedicated relaxation space.

Scenario:

- Short cognitive reset moments
- Breathing exercises

Impact on Learning

- Improves focus
- Reduces stress
- Supports cognitive recovery

Research-backed

- Mindfulness enhances academic performance
- Reduces cognitive overload
- Improves attention and engagement

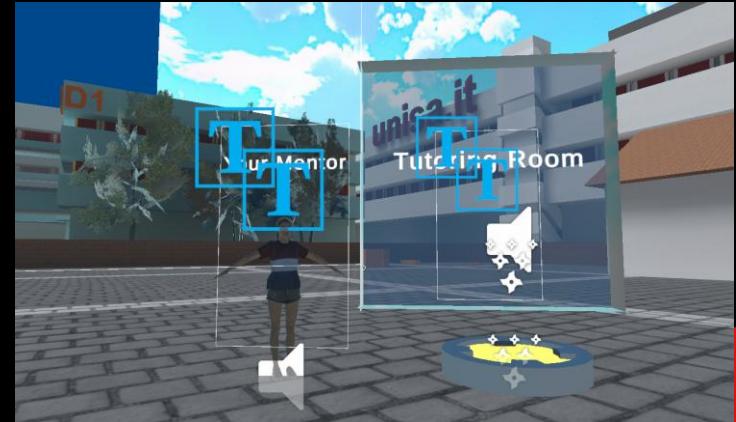

What we built

Tutoring

Mindfulness

Project Value

Students

- Better understanding.
 - Increased autonomy.
 - Reduced stress.
-

University

- Scalable support system.
 - Innovative learning experience.
 - Student-centered approach.
-

Thanks for Your Kind Attention!
